iceCUBED-X launch Monero markets in South Africa

FOR IMMEDIATE RELEASE

Johannesburg, South Africa – ICE³X has announced the launch of Monero on their trading platform. ICE³X is the first and only crypto currency exchange on the continent to list the Monero coin, offering XMR/ZAR & XMR/BTC markets from the get go.

Already offering seven other crypto currencies, iceCUBED-X believe that Monero is a suitable addition to the exchange due to its unique architecture, buzzing community and most importantly, a well resourced development model. Africa has a dedicated crypto-currency community, yet they are sometimes restricted to local markets.

Traders who have registered with the iceCUBED exchange are presently able to deposit and withdraw Monero to and from their ICE³X accounts. The XMR/BTC market is expected to open for trading on Friday 27 April 2018, with the the XMR/ZAR market going live on the 1st May 2018. **0% Trading Fees apply to XMR/BTC trades until 31 May 2018.**

“We think Monero is currently the most suitable coin to add to the exchange, because it is fundamentally different from bitcoin, has a real world use case and somehow managed to stay true to the *original idea* around which Bitcoin was created” said Gareth Grobler, CEO of ICE³X.”

Traders are welcome to sign up [here](#) to trade Monero on iceCUBED-X. Further information on how to trade Monero or frequently asked questions can be found on our service desk portal help.ice3.com.

ICE3X.COM have been operating as a trusted crypto-currency exchange in South Africa since 2013. ICE³X / ice3x.com is registered in South Africa with CIPC as “Internet Currency Evolution Cubed (PTY) Ltd”. More information about iceCUBED-X on our website www.ice3x.co.za
